VL FOR ATTRID: 166 - LANDING GEAR TYPE

Values Edited

12 | Quadricycle

Explanation

This term is used for a landing gear that consists of four retractable wheel assemblies: two forward and two aft of the aircraft's centre of gravity.

This term is used for a landing gear that consists of four retractable wheel assemblies: two forward and two aft of aircraft`s centre of gravity.

3 | Amphibious

10 | Mono-wheel/skid, fixed

100 | Tricycle

4 | Ski

9 | Tailwheel/tailskid, retractable

Explanation

Tailwheel/tailskid retractable is a landing gear consisting of retractable two wheel assemblies forward of the aircraft's centre of gravity and a smaller wheel assembly or skid aft of the centre of gravity, which may be retractable.

Tailwheel/tailskid retractable is a landing gear consisting of retractable two wheel assemblies forward of the aircr centre of gravity and a smaller wheel assembly or skid aft of the centre of gravity, which may be retractable.

1 | Hull/float equipped

99 | Unknown

98 | Other

11 | Mono-wheel, retractable

7 | Skid

8 | Tailwheel/tailskid, fixed

Explanation

Tailwheel/tailskid fixed is a landing gear consisting of two wheel assemblies forward of the aircraft's centre of gravity and a smaller wheel assembly or skid aft of the centre of gravity. The landing gear cannot be retracted.

Tailwheel/tailskid fixed is a landing gear consisting of two wheel assemblies forward of the aircraft`s centre of gra and a smaller wheel assembly or skid aft of the centre of gravity. The landing gear cannot be retracted.

6 | Tricycle, retractable

Explanation

Tricycle landing gear consists of a forward (nose) wheel and wheel

Tricycle landing gear consists of a forward (nose) wheel and wheel assemblies located aft of the aircraft`s centre o gravity. The nose gear is steerable by means of the rudder pedals. The landing gear can be retracted into the body

3725 | TRENT 900

Explanation

The Trent 900 engine is a three shaft high bypass ratio, axial flow, turbofan with Low Pressure, Intermediate Pressure and High Pressure Compressors driven by separate turbines through coaxial shafts. The LP Compressor fan diameter is 2.95m with a swept fan blade and OGV's to increase efficiency and reduce noise. The combustion system consists of a single annular combustor. The LP and IP assemblies rotate independently in an anti-clockwise direction, the HP assembly rotates clockwise, when viewed from the rear of the engine. The Compressor and Turbine have the following features-Compressor: LP – Single Stage fan IP – 8 stage, axial flow HP – 6 Stage, axial flow Turbine LP-5 Stage, axial flow IP – Single Stage, axial flow HP – Single Stage, axial flow The engine control system utilises an EEC (Electronic Engine Controller) which has an airframe interface for digital communications (AFDX).

Explanation

This turbojet engine is optimised for the new generation of high-tech anti-ship missiles, target drones and remotely piloted vehicles. General characteristics Type: Single Spool Turbojet Length: 680 mm (26.77 in) Diameter: 280 mm (11.02 in) Dry weight: 44 kg (97 lb) Components Compressor: 4 stage axial Combustors: Annular Turbine: Single-stage Fuel type: JP8, JP10

Explanation

The Trent 700 engine is a three shaft high bypass ratio, axial flow, turbofan with Low Pressure, Intermediate Pressure and High Pressure Compressors driven by separate turbines through coaxial shafts. The LP Compressor consists of 26-off Wide Chord Fan Blades. The combustion system consist of a single annular combustor, with 24-off Fuel Spray Nozzles. The LP, IP and HP assemblies

The Trent 700 engine is a three shaft high bypass ratio, axial flow, turbofan with Low Pressure, Intermediate Pressu and High Pressure Compressors driven by separate turbines through coaxial shafts. The LP Compressor consists o off Wide Chord Fan Blades. The combustion system consist of a single annular combustor, with 24-off Fuel Spray Nozzles. The LP, IP and HP assemblies rotate independently, and in an anti-clockwise direction when viewed from t rear of the engine. The Compressor and Turbine have the following features-Compressor: LP – Single stage IP – 8 s HP – 6 stageTurbine: LP – 4 stage IP – single stage HP – single stageThe engine control system utilises an EEC (Electronic Engine Controller) which has an airframe interface for digital communications (ARINC) .

Explanation

The Trent 800 engine is a three shaft high bypass ratio, axial flow, turbo-fan with Low Pressure, Intermediate Pressure and High Pressure Compressors driven by separate turbines through coaxial shafts. The engine has a by-pass ratio of 6.4:1 at a typical cruise thrust. The LP, IP and HP assemblies rotate independently, and in an anti-clockwise direction when viewed from the rear of the engine. The Compressor and Turbine have the following features: Compressor: LP – Single Stage fan IP – 8 stage, axial flow HP – 6 Stage, axial flow Turbine LP - 5 Stage, axial flow IP – Single Stage, axial flow HP – Single Stage, axial flow The combustion system consists of a single annular combustor liner with 24 fuel nozzles. The engine control system

The Trent 800 engine is a three shaft high bypass ratio, axial flow, turbo-fan with Low Pressure, Intermediate Press and High Pressure Compressors driven by separate turbines through coaxial shafts. The engine has a by-pass ratio 6.4:1 at a typical cruise thrust. The LP, IP and HP assemblies rotate independently, and in an anti-clockwise directio when viewed from the rear of the engine. The Compressor and Turbine have the following features:Compressor: LI Single Stage fan IP – 8 stage, axial flow HP – 6 Stage, axial flowTurbine LP - 5 Stage, axial flow IP – Single Stage, axia flow HP – Single Stage, axial flow The combustion system consists of a single annular combustor liner with 24 fuel nozzles. The engine control system utilises an EEC (Electronic Engine Controller) which has an airframe interfacef digital communications (ARINC) .

3726 | TRENT 1000

Explanation

The Trent 1000 engine is a three shaft high bypass ratio, axial flow, turbofan with Low Pressure, Intermediate Pressure and High Pressure Compressors driven by separate turbines through coaxial shafts. The LP Compressor fan diameter is 2.85m with a swept fan blade and OGV's. The combustion system consists of a single annular combustor with 18-off fuel spray nozzles. The LP and IP assemblies rotate independently in an anti-clockwise direction, the HP assembly rotates clockwise, when viewed from the rear of the engine. The Compressor and Turbine have the following features: Compressor: LP – Single Stage fan IP – 8 stage, axial flow HP – 6 Stage, axial flow Turbine LP-5 Stage, axial flow IP – Single Stage, axial flow HP – Single Stage, axial flow The engine control system utilises an EEC (Electronic Engine Controller) which has an airframe interface for digital bus communications. An EMU (Engine Monitor Unit) is fitted (to provide vibration signals to the aircraft).
